WORK EXPERIENCES

01/02/2024 – ongoing
Fixed term staff researcher at INAF-OAS
Work within PRIN 2022 (PI Dr. Francesco Calura) to set up initial conditions and run a cosmological box with milky-way-like haloes with a sub-parsec resolution up to $z = 6.14$ for studying the formation of young stellar clumps.

01/08/2023 – 11/08/2023
Visiting Dr. Klaus Dolag at LMU (Munich)
Performed accuracy analysis of the GPU porting for the hydrodynamics, gravity, and performance analyses of self-interacting dark matter physics solvers in the OpenGadget3 code.

01/04/2023 – 31/01/2024
Postdoc at INAF-OAS
I am leading a Euclid Consortium Key Project paper (submitted to A&A) on multi-wavelength mock observations (from possible SZ, X-ray, optical, and weak gravitational lensing data) from hydrodynamic simulations and the impact of projection effects. I also planned, ran, and analysed zoom-in cosmological simulations of galaxy clusters with self-interacting dark matter.

01/04/2022 – 31/04/2022
Visiting LMU (Munich) with grants HPC-Europa3 (HPC17YMAKH)
Work on self-interacting dark matter optimisation within P-Gadget3 code.

01/04/2021 – 31/03/2023
Postdoc at Università di Bologna
Work on the impact of AGN feedback and self-interacting dark matter in galaxy-galaxy strong lensing signal in the core of galaxy clusters within the collaboration PRIN ZOOMING (PI: Prof. Piero Rosati) focused on mass-modelling from strong lensing.

I semester 2020/2021
Lab assistant
Foundation of HPC class of High Performance Computing SISSA/ICTP master

I semester 2021/2022
Lab assistant
Advanced lab. for programming in physics at Physics department of University of Trieste

01/04/2019 – 31/03/2021
Postdoc at INAF-OATs
Work on performance analyses and bottlenecks for preparing the Gadget code for running zoom-in high-resolution cosmological hydrodynamic simulation suites Dianoga (PI: Prof. Stefano Borgani, Dr Elena Rasia, Prof. Klaus Dolag). Study of the dependence of the properties of dark matter and baryons, as well as halos and their satellites, on cosmological parameters, within the context of cosmological hydrodynamical simulations (see Ragagnin et al. 2021, 2023). Collaboration with Dr. Moritz Fischer (LMU) on his PhD thesis, focusing on developing a Self-Interacting Dark Matter (SIDM) physics module within the OpenGadget3 simulation code.

01/01/2019 – 31/03/2019
Postdoc at Leibniz Supercomputing Centre (LRZ)

Performance testing of codes for hydrodynamic cosmological simulations on the new supercomputer (SuperMuc-NG).

01/10/2014 – 31/12/2018

PhD fellowship

Ph.D. program as part of the International Max Planck Research School (IMPRS) on Astrophysics, in collaboration between Ludwig-Maximilians-Universität (LMU), LRZ supercomputing centre, and the Excellence Cluster Universe (`https://www.universe-cluster.de/`).

11/06/2018 – 16/06/2018

Visiting Dr. Claudio Gheller at CSCS (Switzerland)

Supervised intern Conradin Roffler (ETH Zurich) on the GPU porting of the cooling and stellar formation model in the Gadget3 code.

Other experiences

I worked from September 2007 to December 2007 as a junior system administrator for Sinterim Spa at Cimolai Spa, from February 2008 to August 2008 as a PHP programmer for Manifattura Web Srl, and from January 2014 to August 2014 as a Java programmer for ZConsultancies.

EDUCATION AND TRAINING

18/12/2018

PhD Title (cum laude)

Thesis “From the mass-concentration relation of haloes to GPUs and into the web: a guide on fully utilizing super computers for the largest, cosmological hydrodynamic simulations”, at University Ludwig-Maximilians-Universität (LMU) München, supervisor: Dr. Prof. Klaus Dolag.

Repository: `https://edoc.ub.uni-muenchen.de/23521/`

21/11/2013

Master degree in Theoretical Physics (Grade: 110/110 cum laude)

University of Trieste (Italy)

20/07/2011

Bachelor degree in Physics (Grade: 110/110)

University of Trieste (Italy)

PERSONAL SKILLS

Mother tongue: Italian

Other languages

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
English	C1	C2	C1	C1	C2
Deutsch	A1	A1	A1	A1	A1

Levels: A1 and A2: Basic user – B1 and B2: Independent user – C1 and C2: Proficient user
Common European Framework of Reference for Languages

Digital Skills: Windows, Microsoft Office, Microsoft Excel, HTML, CSS, Javascript, Linux, HPC, C/C++, Python, MPI, OpenMP, OpenACC, P-Gadget, SUBFIND

CONFERENCES AND MEETINGS

09-20/06/2025 Invited to SIDM workshop, organised by Dr. Giulia Despali, Prof. HaiBo-Yu (Valencia, Spain)
03-07/02/2025 Invited to IFPU focus week: Substructures in multiscale host haloes: from Galaxies to Clusters (Italy)
28/06/2024 Talk on SIEGE simulations on "A lens on globular cluster nurseries", Sexten (Italy)
23/01/2024 Talk on my Euclid first author paper @ Euclid Cluster of Galaxies SWG meeting, Innsbruck

26/19/2023	Talk "Feedback and resolution do not improve the low lensing signal of simulated cluster cores " @ online Yale seminar "DM on small scales", PI Priyanka Natarajan
31/07/2023	Talk "Velocity dependent SIDM effects on galaxy cluster strong-lensing signals" @ Munich Observatory (USM)
19/06/2023 – 30/06/2023	Self-interacting dark matter meeting (Pollica) talk "Velocity dependent SIDM effects on galaxy cluster strong-lensing signals"
02/2023	Talk @ Euclid Galaxy Clusters SWG meeting in Bologna
02/2023	INAF-OAS colloquium seminar "Strong-lensed galaxies in simulated and observed galaxy clusters"
24/01/2023 – 26/01/2023	Zooming PRIN workshop “A golden era for strong gravitational lensing: new data, modelling and applications”, Milano
09/2023	Talk "Galaxies in the central regions of simulated galaxy clusters" @ CLUSTER3, Bologna
07/2022	Invited talk "Galaxies in the central regions of simulated galaxy clusters" @ RAS National Astronomy Meeting (NAM, University of Warwick, UK)
07/2022	Talk "Galaxies in the central regions of simulated galaxy clusters" @ Cosmology From Home
2020	NVIDIA virtual Hackaton @ CSC
2020	Invited talk "Bringing Zoom-In Initial Conditions of Cosmological Simulations on GPUs" @ OpenACC Summit (virtual)
01/2020	HydroSim meeting (hydrodynamic simulation meeting, Munich) @ Munich Observatory
2019	Talk "Gadget3 on GPUs with OpenACC" @ ParCo (Prague)
2018	Invited poster "Gadget3 (N-Body gravity + SPH) on GPUs" @ GPU Technology Conference (GTC, Munich)
2017	Invited poster "A web portal for large cosmological simulation data" @ EnviroInfo (Munich)
2017	EuroHack OpenACC workshop @ CSCS Lugano
2016	Poster "A multi node Barnes Hut solver on GPUs for Gadget3" @ Perspectives of GPU in science (Rome)
2016	Talk @ HydroSim workshop (Trieste)
2016	Talk "A web interface to federalize the outcome of large, cosmological, hydrodynamic simulations" @ Astronomical Data Analysis Software and Systems (ADASS, Trieste)
2015	Talk "Exploiting the Space Filling Curve Ordering of Particles in the Neighbour Search of Gadget3" @ International Conference on Parallel Computing (ParCo, Edinburgh)

REFEREE

2022	Referee for MNRAS
2022	Referee for Astronomy & Computing

COLLABORATIONS

Member of Euclid Consortium
Member of Euclid Clusters of Galaxies Science Working Group
Member of Observable-Mass relation Euclid key-project
Member of Dianoga simulations (PIs Klaus Dolag, Elena Rasia, Stefano Borgani)
Member of Magneticum (PI Klaus Dolag)
Member of Darkium on Self-Interacting Dark Matter (PI Moritz Fisher)
Member of OpenGadget3 developer team (PI Klaus Dolag)

GRANTS

04/2022	HPC-Europa3 (HPC17YMAKH) of one month visiting grant

COMPUTING RESOURCES

08/2024	PI EuroHPC regular (EHPC-REG-2024R01-029) of 84 000 node hours on Leonardo at CINECA
08/2023	PI CINECA Iscra C (IsCb1 openaccg)
08/2023	PI EuroHPC Benchmark Call (EHPC-BEN-2023B08-013) 3500 Leonardo Booster node hours
2023	PI PLEIADI Bologna project "SIDM vs CDM 2" 400 000 CPU hours
2022	Collaborator CINECA account LEAP 041 (PI Dr. Milena Valentini) 100 000 CPU hours
2023	Collaborator INAF computing time account INA23 C9B06 (PI Dr. Elena Rasia) 550 000 CPU hours
2022	PI PLEIADI Trieste project "SIDM vs CDM" 466 000 CPU hours

2022 Collaborator CINECA Iscra B account IsB24 HRCLUS (PI Dr. Luca Tornatore) 704 000 CPU hours
2021 Collaborator INAF computing time INA21 C8A63 (PI Dr. Tiago Castro) 480 000 CPU hours
2021 Collaborator CINECA Iscra B IsB22 ECOCLUS (PI Dr. Giuseppe Murante) 750 000 CPU hours
2020 Collaborator INAF computing time INA20 C7A68 (PI Dr. Elena Rasia) 400 000 CPU hours
2019 Collaborator CINECA Iscra B IsB18 SimClus (PI Prof. Stefano Borgani) 500 000 CPU hours
2017 Collaborator INAF computing time INA17 C5A46 (PI Prof. Stefano Borgani) 186 000 CPU hours

MENTIONS

06/2017 Press release of the web portal (https://c2papcosmosim.uc.lrz.de/) presented in Ragagnin et al. (2017), see: `https://www.sciencedaily.com/releases/2017/06/170620114101.htm`, `https://idw-online.de/en/news676410https://www.gauss-centre.eu/results/astrophysics/magneticum-pathfinder-a-web-interface-to-access-simulation-data`.

12/01/2015 Mention as master student working with MUPPI simulations (PI: Dr. Giuseppe Murante), url: `https://www.media.inaf.it/2015/01/12/il-futuro-delle-galassie-in-scatola/`
